

Vocabulary List

Windows 11 with JAWS Lesson 7

Term	Definition	Skills ✓
All Apps Button in the Start Menu	A button located in the Start menu that opens an alphabetical list of installed apps on your PC.	
More Button	A button in the Start menu that expands the Recommended section into a larger vertical list.	
Pinned Section of the Start Menu	The section of the Start menu that displays several thumbnail images of pinned apps, depending on what Microsoft and/or your computer manufacturer may have pre-loaded. There are 18 or more items here, typically arranged in several rows and columns, within a small scrolling window inside the Start menu.	
Power Button in the Start Menu	The Power button is just to the right of the User Account button in the Start menu. It contains a menu for Sign in Options, Sleep, Shut Down, and Restart.	
Recommended Section of the Start Menu	A part of the Start menu with items initially pre-populated by Microsoft or OEMs. As time goes on, this shows recent files, etc.	
Search App	The Windows 11 search feature, which has the search edit box at the top as well as areas for Top Apps, Recent, and Quick Searches.	
Start Button	The first button on the Taskbar. It is used to open the Start menu.	
Start Menu	The Windows menu that contains a search edit box at the top, an area of pinned apps, recommended items, and user account, lock screen, and power options.	
User Account button in the Start Menu	The User Account button in the Start menu gives one another way to access account settings as well as lock the computer or sign out.
