

Vocabulary List

Windows 11 with JAWS Lesson 8

Term	Definition	Skills ✓
All Apps Button	A button located in the Start menu that opens an alphabetical list of installed apps on your PC.	
Application Key	A key usually found on the bottom-right of the keyboard, between the ALT and CTRL keys, but it can be placed in a different location by computer manufacturers. Some keyboards do not have an Application key, so SHIFT+F10 may be used as an alternative.	
Context Menu	A menu that opens by clicking an item once with the right mouse button. Keyboard users may press the APPLICATION key or SHIFT+F10 . Items in the context menu may vary depending on what is available at the time it is invoked.	
Desktop List View	A group of items arranged in rows, columns, or both, with text labels and/or icons.	
Pinned Section of the Start Menu	The section of the Start menu that displays several thumbnail images of pinned apps, depending on what Microsoft and/or your computer manufacturer may have pre-loaded. There are 18 or more items here, typically arranged in several rows and columns, within a small scrolling window inside the Start menu.	
Start Menu	The Windows menu that contains a search edit box at the top, an area of pinned apps, recommended items, and user account, lock screen, and power options.	
Windows Icon	A small graphic square or tile approximately 2-3cm in size that represents a shortcut to launch apps, folders, etc. These are usually found on the desktop.
